

This guide will cover the Learner Tile and view if a student passed or failed an exam.  
Need additional help or have more questions?

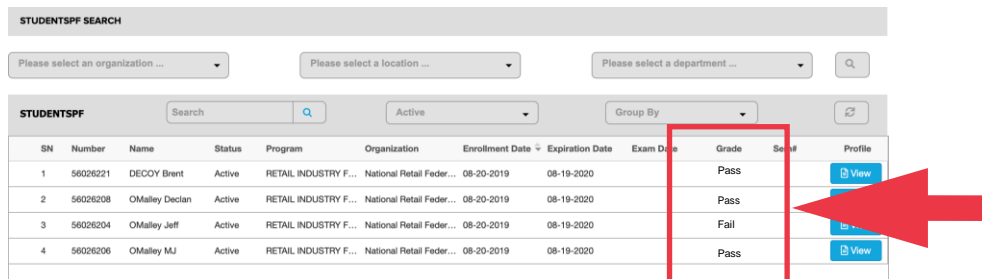

Note: Proctors are granted limited access to the “Learner” tile to be able to view whether a student passed or failed a completed exam. This functionality will be the same for trainers who have full access to the “Learner” tile.

1. From the left hand navigation click on the “Learner” tile.

2. Use the search function or the sort features to find the student or group of students you are interested in.

3. You will see a Pass/Fail in the grade column to the right of the table.
